Profile Summary

Full-Stack Developer with expertise in MERN Stack, building scalable, high-performance web applications.

Experience

VSDL IT Solution

July 2024 – Present

QA Teastor & SEO Associate

Leander, TX

- Contributed to two major projects: **CDO (Computer Degrees Online)** and **FOC (Find Our College)**.
- Collected and organized comprehensive data on colleges across USA to support content development and outreach strategies.
- Built and managed high-quality backlinks to improve website visibility and search engine ranking.
- Collaborated with the digital marketing team to optimize landing pages and improve user engagement.

EazyBytes.com

August 2024 – September 2024

MERN Stack Web Development Intern

Remote

- Designed and developed dynamic, responsive web applications using the **MERN Stack (MongoDB, Express.js, React, Node.js)**.
- Implemented REST APIs and integrated front-end with back-end services.
- Gained hands-on experience with user authentication, CRUD operations, and deployment of web apps.
- Worked in an agile environment, delivering functional features under tight deadlines.

Projects

Digital Marketing Website | [GitHub](#) MERN Stack, Tailwind CSS, Nodemailer

January 2025

- Developed a full-stack digital marketing website with a dedicated **admin panel** to manage blogs, services, and contact submissions.
- Implemented **CRUD operations** in the backend using Express and MongoDB for dynamic data management.
- Integrated **Nodemailer** to automate client communication and send confirmation emails upon successful form submissions.
- Built a responsive, modern UI using **React** and **Tailwind CSS**, focusing on user experience and accessibility.

E-commerce API | [GitHub](#) Node.js, Express.js, MongoDB

November 2024

- Designed and developed a **RESTful API** for managing product inventory including product creation, updates, listing, and deletion.
- Implemented a modular architecture with separate models, controllers, and routes for better scalability and maintainability.
- Utilized **Mongoose ORM** for efficient database operations and validation.
- Thoroughly tested all endpoints using **Postman** to ensure functionality and reliability.

Real-Time Chat Application | [GitHub](#) Node.js, Express.js, Socket.io, MongoDB

November 2024

- Built a real-time chat application enabling users to join chat rooms and exchange instant messages using **Socket.IO**.
- Integrated **MongoDB** for storing and retrieving chat history for persistent user conversations.
- Implemented responsive and intuitive UI with dynamic updates for seamless user experience.
